## PROFESSIONAL SUMMARY

AI/ML graduate with hands-on experience in Machine Learning, Deep Learning, Computer Vision, and full-stack development using Next.js, React, Node.js, and FastAPI. Built a real-time computer vision pipeline achieving 85% detection accuracy and a role-based access control platform serving approximately 5,000 users at 342ms p95 latency. Strong foundation in Data Structures and Algorithms (800+ LeetCode problems solved) and DBMS.

## TECHNICAL SKILLS

**Programming Languages:** Python, JavaScript, SQL

**Frameworks and Libraries:** Next.js, React.js, Node.js, Express.js, FastAPI, Tailwind CSS

**Databases and Tools:** PostgreSQL, MongoDB, Prisma, Docker, AWS EC2, Git, GitHub, Vercel, REST API, JSON

**Concepts and Coursework:** Machine Learning, Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems

## EXPERIENCE

**Artificial Intelligence Intern**, Infosys Springboard | December 2025 - April 2026

- Built hands-on skills in Machine Learning, Deep Learning, Natural Language Processing, Generative AI, Prompt Engineering, and Data Analytics, applying core concepts to real datasets over a 4-month internship.
- Performed exploratory data analysis on a road accident dataset of 10,000+ records, cleaning, visualizing, and statistically analyzing key variables, and identified the top contributing factors behind high-severity accidents for stakeholders.

## PROJECTS

**Seat Allocation and Project Mapping System** | June 2026 - July 2026

Live Demo: [ethara-sapsm.vercel.app](https://ethara-sapsm.vercel.app) | GitHub: [github.com/dhruvsingh895/Ethara-SAPSM](https://github.com/dhruvsingh895/Ethara-SAPSM)

Technologies: Next.js, FastAPI, PostgreSQL, JWT, Gemini AI, Docker

- Built a secure, role-based seat and project allocation platform for an organization of approximately 5,000 employees, enforcing role-based access control across 52 role-endpoint combinations and sustaining 342ms p95 latency under concurrent load.
- Designed an AI-powered natural language query assistant using Gemini AI, protected by a 5-layer security system defending against prompt injection attacks.

**Vehicle Detection and Counting System (TrafficVision)** | June 2025 - March 2026

GitHub: [github.com/dhruvsingh895/trafficvision](https://github.com/dhruvsingh895/trafficvision)

Technologies: Python, OpenCV, YOLOv8, ByteTrack, SQLite, Pandas, Streamlit

- Built a real-time computer vision pipeline processing 1,000+ frames per minute using background subtraction, contour detection, and Gaussian filtering, achieving 85% detection accuracy.
- Reduced false positives by 30% versus the baseline model using centroid-based tracking and line-crossing logic, and documented the system architecture for handoff and reuse.

**1Fi - Fintech Marketplace Platform** | March 2026 - May 2026

Live Demo: [1-fi-mu.vercel.app](https://1-fi-mu.vercel.app) | GitHub: [github.com/dhruvsingh895/1Fi](https://github.com/dhruvsingh895/1Fi)

Technologies: Next.js, React, Prisma, PostgreSQL

- Built a mobile-first fintech marketplace with a product catalog, product variants, and an EMI purchase flow, from database schema design in Prisma and PostgreSQL through a deployed live interface.
- Implemented variant-aware cart and checkout logic allowing users to compare EMI plans before purchase, improving clarity across the buying journey.

## EDUCATION

**B.Tech in Artificial Intelligence and Machine Learning**, Dr. A.P.J. Abdul Kalam Technical University | 2022 - 2026

CGPA: 8.07 / 10

**Intermediate and High School**, Pt. Deen Dayal Upadhyaya Sanatan Dharm Vidyalaya | 2019 - 2022

Intermediate (Class XII): 83.4 percent | High School (Class X): 92.5 percent

## CERTIFICATIONS AND ACHIEVEMENTS

- Solved 800+ LeetCode (Python) and 150+ GeeksforGeeks problems; 5-star Problem Solving rating on HackerRank.
- Completed the Salesforce AI Trailblazer program and Goldman Sachs Software Engineering Job Simulation; AWS Cloud Practitioner Essentials (2025); Google Cloud Generative AI, Simplilearn (2026); Python 101 for Data Science, IBM (2024).
