PROFESSIONAL SUMMARY

AI/ML graduate with hands-on experience in Machine Learning, Deep Learning, Computer Vision, and full-stack development (React.js, Node.js, FastAPI). Builds production-style applications in Python with REST APIs, SQL, and Docker — recent work includes a real-time computer vision pipeline at 85% detection accuracy and a role-based platform serving ~5,000 users at 342ms p95 latency. Strong foundation in Data Structures & Algorithms (750+ LeetCode problems solved) and DBMS.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University 2022 – 2026

B.Tech in Artificial Intelligence & Machine Learning | CGPA: 8.07 / 10

Pt. Deen Dayal Upadhyaya Sanatan Dharm Vidyalaya 2019 – 2022

Intermediate (Class XII): 83.4% | High School (Class X): 92.5%

EXPERIENCE

Artificial Intelligence Intern, Infosys Springboard Dec 2025 – Apr 2026

- Built practical, hands-on skills in Machine Learning, Deep Learning, NLP, Generative AI, Prompt Engineering, and Data Analytics over a 4-month AI internship, applying core concepts to real datasets.
- Performed Exploratory Data Analysis (EDA) on road accident data — cleaning, visualizing, and statistically analyzing key variables to surface actionable safety insights for stakeholders.

PROJECTS

Seat Allocation & Project Mapping System | Next.js, FastAPI, PostgreSQL, JWT, Gemini AI, Docker Jun – Jul 2026

- Purpose:** give a ~5,000-employee organization a secure, role-based way to manage seat and project allocation, with an AI-powered natural language query assistant using Gemini AI.
- Impact:** achieved 342ms p95 latency under concurrent load, enforced role-based access control across 52 role-endpoint combinations, and built a 5-layer security system protecting the AI query feature from injection attacks.

Taskflow | React.js, Node.js, Express.js, MongoDB, JWT, REST API Mar – May 2026

- Purpose:** give teams a secure, centralized way to assign and track tasks. Built a full-stack app with JWT authentication, priority management, and due-date tracking, backed by 10+ RESTful APIs.
- Impact:** improved workflow efficiency and frontend responsiveness by optimizing React component rendering and API call handling across task categorization and status-tracking flows.

Vehicle Detection and Counting System | Python, OpenCV, YOLOv8, SQLite, Pandas, Streamlit Jun 2025 – Mar 2026

- Purpose:** automate traffic monitoring to replace manual vehicle counting. Built a real-time computer vision pipeline processing 1,000+ frames/minute using background subtraction, contour detection, and Gaussian filtering.
- Impact:** achieved 85% detection accuracy and cut false positives by 30% vs. the baseline model via centroid-based tracking and line-crossing logic, and documented the architecture for handoff and reuse.

TECHNICAL SKILLS

Languages: Python, Java

Web & Backend: React.js, Node.js, Express.js, FastAPI, HTML, Tailwind CSS, REST API, JSON

Cloud, Tools & Databases: AWS EC2, Docker, Git, GitHub, VS Code, Vercel, PostgreSQL, MongoDB, SQL

Coursework: Data Structures & Algorithms, OOP, DBMS, Artificial Intelligence, Machine Learning

ACHIEVEMENTS & CERTIFICATIONS

- Solved 750+ problems on LeetCode (Python) and 150+ on GeeksforGeeks; 5-star Problem Solving rating on HackerRank.
- Completed Salesforce AI Trailblazer program and Goldman Sachs Software Engineering Job Simulation.
- AWS Cloud Practitioner Essentials — Amazon Web Services (2025) | Google Cloud Generative AI — Simplilearn (2026) | Python 101 for Data Science — IBM Cognitive Class (2024)
