PROFESSIONAL SUMMARY

AI/ML graduate skilled in Machine Learning, Deep Learning, Computer Vision, and full-stack development (React.js, Node.js, FastAPI). Delivers production-style applications using Python, REST APIs, SQL, and Docker, translating requirements into measurable performance and efficiency gains. Solved 700+ problems on LeetCode, strong foundation in Data Structures & Algorithms and DBMS.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University 2022 - 2026
B.Tech in Artificial Intelligence & Machine Learning | CGPA: 8.07 / 10

Pt. Deen Dayal Upadhyaya Sanatan Dharm Vidyalaya, Kanpur 2019 - 2022
Intermediate (Class XII): 83.4% | High School (Class X): 92.5%

EXPERIENCE

Artificial Intelligence Intern, Infosys Springboard (Remote) Dec 2025 - Apr 2026

- Completed a 4-month AI internship covering Machine Learning, Deep Learning, NLP, Generative AI, Prompt Engineering, and Data Analytics, applying concepts to real datasets.
- Performed Exploratory Data Analysis (EDA) on road accident data — cleaning, visualizing, and statistically analyzing key variables to surface actionable safety insights for stakeholders.

PROJECTS

Vehicle Detection and Counting System | Python, OpenCV, YOLOv8, SQLite, Pandas, Streamlit Jun 2025 - Mar 2026

- Purpose: automate traffic monitoring to replace manual vehicle counting. Built a real-time computer vision pipeline processing 1,000+ frames/minute using background subtraction, contour detection, and Gaussian filtering.
- Impact: achieved 85% detection accuracy and cut false positives by 30% vs. the baseline model via centroid-based tracking and line-crossing logic, and documented the architecture for handoff and reuse.

Taskflow | React.js, Node.js, Express.js, MongoDB, JWT, REST API Mar 2026 - May 2026

- Purpose: give teams a secure, centralized way to assign and track tasks. Built a full-stack app with JWT authentication, priority management, and due-date tracking, backed by 10+ RESTful APIs.
- Impact: improved workflow efficiency and frontend responsiveness by optimizing React component rendering and API call handling across the task categorization and status-tracking flows.

Seat Allocation & Project Mapping System | Next.js, FastAPI, PostgreSQL, JWT, Gemini AI, Docker Jun – Jul 2026

- Purpose: Built a role-based seat and project allocation platform for approximately 5,000 employees, including an AI-powered natural language query assistant using Gemini AI.
- Impact: Achieved 342ms p95 latency under concurrent load and enforced role-based access control across 52 role and endpoint combinations, with a 5-layer security system protecting the AI query feature from injection attacks.

TECHNICAL SKILLS

Languages: Python, Java, SQL | Web & Backend: React.js, Node.js, Express.js, FastAPI, HTML, Tailwind CSS, REST API, JSON
Cloud, Tools & Database: AWS EC2, Docker, Git, GitHub, VS Code, Vercel, PostgreSQL, MongoDB
Coursework: Data Structures & Algorithms, OOP, DBMS, Artificial Intelligence, Machine Learning

ACHIEVEMENTS & CERTIFICATIONS

- Solved 700+ problems on LeetCode (Python) and 100+ on GeeksforGeeks; 5-star Problem Solving rating on HackerRank.
- Completed Salesforce AI Trailblazer program and Goldman Sachs Software Engineering Job Simulation.
- AWS Cloud Practitioner Essentials — Amazon Web Services (2025) | Google Cloud Generative AI — Simplilearn (2026)
| Python 101 for Data Science — IBM Cognitive Class (2024)
