Portfolio: portfolio-iota-brown-94.vercel.app

PROFESSIONAL SUMMARY

AI/ML graduate building full-stack applications, LLM-powered data pipelines, and computer vision systems. Hands-on experience with Python, React, Next.js, FastAPI, and PostgreSQL, including role-based access control, structured AI extraction, and automated testing. Strong problem-solving foundation with 800+ LeetCode problems solved.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frameworks & Libraries: React, Next.js, Node.js, Express.js, FastAPI, Pydantic, OpenCV, YOLOv8

Databases & Tools: PostgreSQL, MongoDB, SQLite, Prisma, Docker, Git, GitHub Actions, Playwright, pytest

Core Concepts: Data Structures & Algorithms, OOP, DBMS, REST APIs, Machine Learning, Computer Vision

EXPERIENCE

Artificial Intelligence Intern, Infosys Springboard | December 2025 - April 2026

- Applied machine learning, deep learning, NLP, generative AI, and data analytics concepts to practical datasets during internship training.
- Analyzed 10,000+ road-accident records through data cleaning, visualization, and statistical analysis to identify factors associated with high-severity accidents.

PROJECTS

Seat Allocation and Project Mapping System

Live Demo: ethara-sapsm.vercel.app | GitHub: github.com/dhruvsingh895/Ethara-SAPSM

Technologies: Next.js, FastAPI, PostgreSQL, SQLAlchemy, JWT, Gemini AI

- Built seat allocation, project mapping, and utilization dashboards with four access roles on 5,000 seeded employee records; recorded 342 ms p95 for employee listing in a five-user k6 load test.
- Implemented natural-language-to-SQL queries with SQL validation, read-only database access, query timeouts, and audit logging; added an RBAC audit covering 52 role-endpoint combinations.

AI-Powered Company Research & Data Extraction

GitHub: github.com/dhruvsingh895/SoftwareBrio_project | [Recorded Demo](#)

Technologies: Python, async Playwright, Pydantic, NVIDIA / Anthropic APIs, pytest

- Built an asynchronous website-to-JSON pipeline that extracts company profiles, contacts, and leadership using LLM tool calls, strict schema validation, and source-evidence checks.
- Added per-domain failure isolation, retries, token-usage accounting, and atomic outputs; validated a live three-company batch spanning 16 pages, with 67 tests passing in the recorded run.

TrafficVision - Vehicle Detection, Tracking and Analytics

GitHub: github.com/dhruvsingh895/trafficvision

Technologies: Python, YOLOv8, ByteTrack, OpenCV, FastAPI, React, TypeScript, SQLite

- Built a video-processing application using YOLOv8 and ByteTrack to detect vehicles and count line crossings by direction, deduplicating crossings by track ID.
- Exposed video upload, processing progress, annotated output, and analytics through FastAPI and React; added tests for counting, direction, deduplication, and API workflows, plus CI checks.

EDUCATION

B.Tech in Artificial Intelligence and Machine Learning | 2022 - 2026

Dr. A.P.J. Abdul Kalam Technical University | **CGPA: 8.07 / 10**

Pt. Deen Dayal Upadhyaya Sanatan Dharm Vidyalaya | 2019 - 2022

Class XII: 83.4% | Class X: 92.5%

CERTIFICATIONS AND ACHIEVEMENTS

- Solved 800+ LeetCode and 150+ GeeksforGeeks problems; earned a 5-star Problem Solving rating on HackerRank.
- Salesforce AI Trailblazer; Goldman Sachs Software Engineering Job Simulation; AWS Cloud Practitioner Essentials (2025); Google Cloud Generative AI, Simplilearn (2026); IBM Python 101 for Data Science (2024).
